A PEER-REVIEWED QUARTERLY JOURNAL

# TURKISH JOURNAL OF UROLOGY

## AIMS AND SCOPE

Turkish Journal of Urology is the scientific, open access and official publication of the Turkish Association of Urology which is being published 4 issues per year; in March, June, September and December.

The aim of the Turkish Journal of Urology is to publish scientifically high-quality research articles. In addition, reviews, editorials, letters to the editor and case reports are also being accepted.

The Turkish Journal of Urology is an international journal, based on the independent and unbiased peer-review principles. The journal's publication language is English. Articles are being reviewed according to the 'double-blind' review system, in which, both the advisors and the authors are blinded. Accepted manuscripts are edited by American Journal Experts.

The target group of the Turkish Journal of Urology is the urology specialists, medical specialty fellows and other specialists and practitioners who are interested in the science of urology.

"Editorial Board Guidelines" including Turkish Journal of Urology's working system and principles is available on journal's website.

Turkish Journal of Urology is indexed in PubMed Central, Web of Science-Emerging Sources Citation Index, TUBITAK ULAKBIM TR Index, Scopus, DOAJ, HINARI, EBSCO, CINAHL, GALE and ProQuest.

### **Subscription**

The annual printed material subscription cost of the Turkish Journal of Urology is 50 Euros, and is being distributed free to the members of the Turkish Association of Urology. The full texts of all the articles are being issued free online at [www.turkishjournalofurology.com](http://www.turkishjournalofurology.com). Those who want to subscribe to the journal should apply to the Turkish Society of Urology.

Address: Prof. Nurettin Oktem Sok. Lale Palas Apt. No: 18/2, 34382 Sisli, Istanbul

Phone: +90 212 232 46 89

Fax: +90 212 233 98 04

E-mail: [uroturk@uroturk.org.tr](mailto:uroturk@uroturk.org.tr)

### **Permissions and Advertisements**

Applications for permissions and advertisements should be made to the Editorial Office.

### **Informations for the Authors**

Instructions for authors are available on the pages of the journal and in the following link: [www.turkishjournalofurology.com](http://www.turkishjournalofurology.com)

### **Responsibility of the Authors**

All opinions and reports within the articles that are published in the Turkish Journal of Urology are the personal opinions of author(s), not the opinions of editors, editorial board or the publisher. The Turkish Association of Urology, editor, editorial board and the publisher do not accept any responsibility for the articles. Acid-free paper is being used in the Turkish Journal of Urology.

# TURKISH JOURNAL OF UROLOGY

## INFORMATION TO AUTHORS

Turkish Journal of Urology is a peer-reviewed journal published by the Turkish Society of Urology. The Journal publishes original articles, case reports, reviews, editorial comments, letters to the editor, guidelines, visual urology (as DVD) and abstracts of materials presented at national urology meetings, pertaining to the field of urologic diseases. Turkish Journal of Urology is published four times a year and its publication language is English.

Manuscripts should be prepared in accordance with *ICMJE-Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals* (updated in December 2015 - <http://www.icmje.org/icmje-recommendations.pdf>). A manuscript will be considered only with the understanding that it is an original contribution that has not been published elsewhere. Before the peer-review process, all submissions are first reviewed by the editor. At the final stage of publication, a comprehensive copy-editing is undertaken for accuracy and clarity, after which galley proofs are sent to the authors for approval.

Authors are responsible for the content of the submitted material. All authors should sign a written consent indicating that they have seen and approved the final version of the manuscript. At the time galley proofs are sent, the authors are required to fill in a form covering authorship contributions, whether any conflict of interest issue exists, and transfer of copyright to the Journal.

Manuscripts reporting the results of experimental studies on human subjects must include a statement that the study protocol was approved by the ethics committee of the institution and informed consent of the subjects was obtained after the nature of the procedure(s) had been fully explained. The authors are strongly requested to send the approval of the ethics committee together with the manuscript. In addition, manuscripts on animal studies should describe procedures indicating the steps taken to eliminate pain and suffering. Authors are advised to comply with internati-

onally accepted guidelines including the Helsinki Declaration, and guidelines for Good Clinical Practice and Good Laboratory Practice and state such compliance in their manuscripts.

Manuscripts should not exceed word limits set by the Journal (including abstract, material and methods, results, and discussion; excluding references, tables/figures, and legends), that is, 3000 words for original articles, 1500 words for case reports reports, and 5000 words for reviews. The maximum number of tables and figures (total) should be 6 regardless of type of manuscript. Abstracts should not exceed 250 words. Author(s), the title of the paper and subtitles should be in Times New Roman, bold, 12 pt. Body text should be in Times New Roman, 12 pt. Authorship should be based only on substantial contributions that meet the authorship criteria.

### Manuscript submission

All manuscripts should be submitted via the on-line system of the Journal at <http://www.journalagent.com/uroloji/>. Instructions for submissions can be found at <http://www.journalagent.com/uroloji/>.

### Manuscript preparation

Manuscripts should be typeset on a standard A4 page layout, with 2.5 cm (1 inch) margins on each side of the page, with double-line spacing and each page numbered consecutively.

Parts of the manuscript should be arranged in the following order: (i) The title is in English (and also Turkish for Turkish authors), (full names of the authors, institutional address (Authors' affiliations must be the institutions where the research presented in the article took place), telephone and fax numbers, and e-mail address will be submitted at steps 3, 4 and 5 of Journal Agent webpage, should NOT be written in main text); (ii) English (and also Turkish for Turkish authors) abstracts; (iii) Introduction; (iv) Material and methods; (v) Results; (vi) Discussion; (vii) References. Any footnote concerning previous presentations or funding of the manuscript should be placed on the title page.

# TURKISH JOURNAL OF UROLOGY

Although *Turkish Journal of Urology* does not specifically limit the number of authors in original articles (except for review and case report articles that number of authors should be limited to 2 and 4, respectively), articles submitted with an unusual number (more than 6) of authors invite scrutiny by editors and reviewers for clear justification for the presence of each person on the authorship list. If the number authors is more than six, correspondent author should upload an 'Authorship Contribution Letter' for the contribution of each author.

The body of the text can be appropriately subtitled. Case reports should be presented under the titles Introduction, Case report, and Discussion. To facilitate reading, reviews can be appropriately subtitled.

**Abstracts:** Abstracts should have the following structure: Objectives, Material and methods, Results, and Conclusion. Abstracts for case reports and reviews should be unstructured.

**Keywords:** Three to five keywords (in alphabetical order) can be submitted. Index Medicus Medical Subjects Headings (MeSH) can be used for this purpose (web page: <http://www.ncbi.nlm.nih.gov/pubmed/>).

**Material and methods:** This section should give information with adequate details on the institution the study was conducted, dates for the study period, patients' characteristics, methods, and how patients were selected. A clear description of the statistical methods should also be given.

**Results:** This section should give findings in detail, supported by illustrations and tables. The authors should avoid repeating data in the text that are already presented in tables and illustrations.

**Discussion:** It should mainly rely on the conclusions derived from the results of the study, with appropriate citations from the most recent research. At the end of the Discussion, any contribution that is not related to authorship can be mentioned under the title Acknowledgements.

Use of abbreviations should be limited to the most standard ones.

**Figures and tables:** Illustrations and tables accompanying the text should be uploaded on-line. The format of illustration files can be JPEG or TIFF. Tables and figure legends should be double-spaced on separate pages. Both tables and illustrations should be numbered with arabic numerals in the order in which they appear in the text. Microscopic photographs should include information on staining and magnification. Full terms for abbreviations should be listed under tables and figures.

**References:** References should be numbered as superscript number in the order in which they are mentioned in the text (e.g. "... technique described by Burnett et al.<sup>[1]</sup> "). Unpublished data or personal communications should not be used. Direct use of references is strongly recommended and the author may be asked to provide full-text of cited references. Journal titles should be abbreviated according to the Index Medicus; otherwise, the full title of the journal should be given. All authors if six or fewer should be listed; otherwise, the first six and "et al." should be written. The style and punctuation should follow the formats outlined below:

**Journal:** Sezen SF, Lagoda G, Burnett AL. Role of immunophilins in recovery of erectile function after cavernous nevre injury. *J Sex Med* 2009;6:340-6.

**Book:** Kratz AR. *Physiology of the kidney*. 3rd ed. Philadelphia:Lippincott Williams & Wilkins; 2000.

**Chapter in a book:** Anderson JL, Muhlestein JB. The role of infection. In: Theodor P, editor. *Extracorporeal ureteric stenting during laparoscopic pyeloplasty*. Philadelphia: W. B. Saunders; 2003. p. 88-107.

When necessary, manuscripts submitted will be edited and corrected by the Editorial Board without altering the original content. Reprints are not provided after the publication.

The transrectal single-port laparoscopic radical prostatectomy in a cadaver model 51  
*Murat Bağcıoğlu, Emre Huri*

A PEER-REVIEWED QUARTERLY JOURNAL

# TURKISH JOURNAL OF UROLOGY

EDITORIAL

Dear Colleagues,

We are very glad for being with you in this first issue of *Turkish Journal of Urology* of the year 2016. Beginning from the year 2016, a new process has begun. As you all know, articles published in the journal from March 2013 on, are accessible on PubMed, and full texts of these articles are available on PubMed Central. Beginning from this year our journal is included in Emerging Sources Citation Index (ESCI) which is a new version of Web of Science (WoS). Thus, our articles published from 2015 on, appear on WoS. I thank all of those who contributed to our journal during this process.

Inclusion of our journal in ESCI scope is an important step. Thanks to these achievements scientific studies published in Turkish Journal of Urology will have a greater chance of searchability, detectability, and citability. At the same time information about its real-time citation performance among WoS databases will be acquired which will facilitate acceptance of our journal in the scope of Science Citation Index Expanded (SCIE)

As is understood from the review of the home page, from this year on as a result of H-index analysis which is an important index for scientists, a change in the Editorial Board has been realized, and Prof. Dr. Fikret Erdemir has joined our staff of associate editors

The keystone of journals is scientific articles of high quality. Being conscious of this fact, we kindly request continuation of your scientific support which has been maintained up to now.

Respectfully Yours

**On behalf of the Editorial Board of Turkish Journal of Urology**  
**Editor in Chief**  
**Prof. Dr. Murat Bozlu, MD**
