

A PEER-REVIEWED BIMONTHLY JOURNAL

TURKISH JOURNAL OF UROLOGY

EDITORIAL

Dear Colleagues;

In line with the target of indexing in SCIE in 2023, Turkish Journal of Urology (TJU) is constantly being renewed. Based on this goal, scientists with high contributions to the discipline of urology have been added to the editorial board. The fifth online issue of the Turkish Journal of Urology in 2021 includes 10 articles from Turkey, USA, India, Indonesia and Iran. In this issue, published articles consist of a reviews in neurourology and endourology, and original articles in Urooncology, Female Urology, Neurourology, and General Urology.

This issue also includes two editorial comments. It is seen that the indications for the use of robotic surgery are gradually increasing in the practice of urology and are being widely used. In connection with this, one of the editorial comments in this issue of the TJU is about the efficacy and safety of robotic prostatectomy in patients with BPH, while the other is about the comparison of nephrolithotomy operations in children and adults.

It is expected that the original research, review and editorial comments published in this issue will contribute to the literature and your future studies as important references. Please always consider TJU as your own journal, submit your evidence-based articles to the journal, do a timely and rigorous process as a reviewer, read the articles published in the journal and quote the articles of the journal.

Respectfully yours,

Ateş Kadioğlu, MD, FECSM
Professor of Urology
University of Istanbul
Editor in Chief
